

# ICE Portable Stocktake Manager

## Integrated Stocktaking made easy with ...

# ICE

## and the Casio DT-X7 Portable Laser Scanner

The ICE Portable Stocktake Manager is an integrated solution that provides a dramatically simplified stocktaking process. Signature Software has been working with a leading Australian provider of data collection solutions to develop a quick, easy to use integrated barcode solution.

Using Casio portable scanners, the ICE Portable Stocktake Manager enables users to count serialised and non-serialised inventory using the Casio DT-X7 Portable Laser Scanner. The LCD display on the device allows a visual reference between the stock you are scanning and its corresponding description in the ICE database. After scanning, reconciliation of the stock count is as simple as placing the scanner back in its cradle and activating the stocktake process within the ICE application.

A revolutionary easy-to-use device for Retail, Distribution, Warehousing, Freight and Manufacturing applications.
